

IMPORTANT INFORMATION

Dear Allotment Friends,

This year we have seen a 15% increase in the fees we are charged by Sefton.

As a result we had to increase the annual allotment fees this year, previously our fees had not increased for many years before the increase this year.

With hindsight, our fees should have increased annually over the last 10 years, but that is hindsight at its best!

BUT..... Sefton are now proposing dramatic increases in the fees they charge us each year per plot for the coming years.

This year they have charged us £119 per plot and next year (2026) this is increasing to £129.20 per plot.

This is before we pay for Water charges, insurance, repairs or improvements to the site.

So, very sadly, quite dramatic increases in annual fees, from next year and beyond are going to be unavoidable.

However, in context, our site fees are still lower than most associations.

Thank You for your understanding, we wanted to give you advance notice of this issue, which concerns us, yet is out of our control.

The Committee.
